The Copper Fork Kitchen & Bar

Based on your statement for Jun 1, 2026 – Jun 30, 2026
Issued November 15, 2026 · Illustrative sample rate card — demo pricing only

What this would save you

$702.21 per month **$8,426.52** per year, projected

Your effective rate on this volume is 3.16% today. On the proposed schedule it would be 2.42%.

SOME FIGURES ARE ESTIMATED
Your statement reports some charges as a total without the unit counts behind them. Those charges are held at their current cost rather than repriced, so they produce no savings in this comparison. They are marked “est.” in the table below.

Your charges, line by line

CHARGE	CURRENT	PROPOSED	CHANGE	
Card and ACH processing (percentage)	$2,351.17	$1,946.36	-$404.81	
Per-transaction charges	$297.40	$122.36	-$175.04	
Network and assessment charges	$242.89	$122.63	-$120.26	
Monthly account service	$0.00	$9.95	+$9.95	
PCI program fee	$0.00	$7.95	+$7.95	
Instant payout charges	$30.00	$30.00	—	est.
Dispute handling charges	$60.00	$40.00	-$20.00	
Total	**$2,981.46**	**$2,279.25**	**-$702.21**	

Refunded amounts and disputed principal are excluded from this comparison. They are movements of your own money rather than charges, so repricing them would overstate the saving.

Conditions attached to this proposal

- Some charges on your current statement are shown as a total without the unit counts behind them. Those lines are estimated rather than recalculated, and are identified individually.
- This proposal is based on 1 statement period. Figures shown as annual are projected from that basis and will vary with seasonality.
